ALLEVIATE YOUR KNEE PAIN NOW

SCIENTIFIC ADVANCEMENT GIVES GENERAL PUBLIC ONE OF THE FINEST TECHNOLOGICAL DEVICES AVAILABLE FOR THE RELIEF OF KNEE PAIN

GET IMMEDIATE RELIEF FROM KNEE PAIN WITHOUT DANGEROUS DRUGS

The finest technological device available for the relief of knee pain is now being released to the general public.

Known as The KNEEDIT Pain Relieving Knee Band, this device is the first of its kind.

This amazing new pain relieving band was designed by the world-renowned orthopedic surgeon and sports medicine specialist, Donald Fareed, M.D.

As a long-time consultant to famous athletes, members of the Davis Cup and other professional sports teams, Dr. Fareed successfully designed KNEEDIT based on 20 years of clinical observation and treatment of Repetitive Stress Injuries (RSI).

Now Dr. Fareed is bringing welcome pain relief where so many people need it, in the most delicate area of your leg, your knee.

The KNEEDIT Pain Relieving Knee Band is an innovative and unique device scientifically designed to assist in the relief of knee pain commonly associated with Arthritis, Tendonitis and Chondromatosis.

It provides this breakthrough pain relief by gently absorbing force at the knee and by exerting concentrated compression and warmth across the soft tissue in the front part of your knee.

Its patented, revolutionary technology is a superior therapy featuring a unique, non-constrictive design of cushioned neoprene curved to the shape of your knee.

The KNEEDIT Pain Relieving Knee Band is a treatment, not a tourniquet.

The product is one of the only specially designed devices which works with the human anatomy to aid in the relief of knee pain without cutting off circulation, hampering movement or causing uncomfortable swelling.

The KNEEDIT uses selective pressure to turn the natural action of your own knee into a pressure releasing miracle, by placing gentle pressure just where it is needed - along the medial and lateral soft tissues of your knee.

While other bands can create a tourniquet effect which can cause uncomfortable tissue swelling, the KNEEDIT Pain Relieving Knee Band allows for normal circulation and blood flow and is simple to apply.

It works in a completely new and unique manner and is highly effective in relieving pain.

For even more information, here is part of my interview with the Product Development and Specialist for JHS.

Q. With all of the other knee bands and supports out on the market today, what makes the KNEEDIT Pain Relieving Knee Band different?

A. The KNEEDIT Pain Relieving Knee Band has several important features and benefits which set it completely apart from other devices that can be found in the marketplace today.

First, the KNEEDIT Pain Relieving Knee Band was designed by an internationally known practicing orthopedic surgeon and sports medicine

specialist with over 27 years experience treating Repetitive Stress Injuries (RSI). So the KNEEDIT was designed with real case life studies, not in some laboratory with artificial knees or plastic model types, but with real life people with real life knee problems.

Secondly, the KNEEDIT Pain Relieving Knee Band functions as an interactive pump and strategic shock absorber rather than a tourniquet like other knee bands that actually may cause swelling and constrict blood flow.

The KNEEDIT was designed with such precision that your muscles will actually relax rather than constrict during physical exertion. This reduces stress on your tendons and muscles, which in turn aids in the relief of your pain and assists in the prevention of further injury.

Third, the KNEEDIT Pain Relieving Knee Band can be worn on the right or left knee by either male or female. Its component pieces are durable and hypo-allergenic and it is made in the U.S.A. It also retains its shape and is still comfortable after hours of use.

Fourth, the KNEEDIT Pain Relieving Knee Band was designed to assist not only in the treatment of knee injuries, but also in the prevention of knee injuries.

Q. How does it work with the anatomy of each person's knee as an individual?

A. KNEEDIT's anatomic design works in conjunction with the motion of each person's knee as an individual. As you move, it gently applies pressure to the correct area of your joint liner and patellar tendon assisting in the relief of your knee pain, soreness, stiffness and inflammation. By stabilizing your inferior pole of your patella, KNEEDIT also may improve patellar tracking.

Q. How long can I wear the KNEEDIT?

A. The KNEEDIT Pain Relieving Knee Band enables your muscles to relax, which reduces stress on your tendons and muscles. So you may wear it for a long period of time with complete comfort.

Q. How do I know if the KNEEDIT will fit me?

A. The KNEEDIT Pain Relieving Knee Band is specially made so that it can be worn on the right or left knee and easily adjusts to fit the contour of the patella and patellar tendon... One size fits most everyone.

Q. Is the KNEEDIT like those big bulky knee braces that everyone can tell you're wearing no matter how hard you try to hide it?

A. No. The KNEEDIT Pain Relieving Knee Band was specially designed so that you get the absolute maximum relief, but no one will know unless you want them to. It is so slim and sleek that it can fit under any type of clothing and is absolutely discreet.

Q. How can you offer such an advanced knee relief product at such a low price for first time buyers when I've seen big bulky custom knee braces that cost \$450.00?

A. Our experience in

BEFORE KNEEDIT

PAIN

Patella tracking
Stress across the front and sides of the joint
Impeded circulation can cause Ankle Swelling!
Patella
Arthritis swelling of the knee
Patellar tendon
Tibia tubercle

Once the knee is injured or strained you experience uncomfortable swelling, hampered movement, cut-off circulation, abnormal circulation and blood flow.

PAIN

KNEEDIT

Testimonies from just a few of the satisfied KNEEDIT users...

"Is it an exaggeration that KNEEDIT is saving my life? Not if you consider that my cardiologist maintains the only certain way to defeat my heart disease is through intense exercise—previously impossible with my perpetually sore knees. The KNEEDIT has made the prescribed intense exercise possible. And yes, my heart disease abated. KNEEDIT works, absolutely."

L.W., Minden, NV

"After 3 months wearing your KNEEDIT purchased from my doctor in Phoenix, Arizona, I noticed the 800# on said article. When I went to my doctor I was on crutches and five treatments did no good, he had me try the KNEEDIT. Well I'm 76 years old, work for a freight company, so I am in and out of vehicles 12 to 14 hours daily. I have arthritis, but since wearing this, I have no pain. It is wonderful. All truck drivers, carpet layers, sports people, anyone that pounds their legs and arms should have one."

Cordially, B.V., Phoenix, AZ

"I normally don't sit down and fire off testimonials, but in this case I am compelled to do just that. When the KNEEDIT arrived and I strapped it to my knee, my wife said there was a look of incredibility on my face that prompted her to say, 'WELL?' When I answered 'Mary I cannot believe what has just taken place.' Needless to mention, the pain instantly went away and I am still amazed. I will eternally be thankful to you. I am 65 and thought that there was no hope."

Thanks a million
J.G., Kingman, AZ

over 30 years of solid American business is that when you have a product this extraordinary... word of mouth is more powerful than any other advertising in the world.

Once your readers discover how great their overall body feels when wearing the KNEEDIT, they will want to buy one for all of their friends and family members, plus anyone else they know who may be experiencing knee pain.

So to get rid of your knee pain right now... to feel more invigorated and alive... to get the relief where you KNEEDIT,

AFTER KNEEDIT

PURE RELIEF

Improves Patella tracking
Patented "wings" decrease stress across the front and sides of the joint
Patented "wings" allow unimpeded circulation. No Ankle Swelling!
Stabilizes Patella
Patented "wings" pump arthritis swelling out of the knee & magnify pumping action & shock absorbing.
Patellar tendon shock absorption. Decreases forces on tibia tubercle.

The KNEEDIT Pain Relieving Knee Band is a unique, non-constrictive device that curves to the exact shape of your knee, working with the human anatomy to aid in the relief of uncomfortable swelling and pain without cutting off circulation, hampering movement or causing uncomfortable swelling. The KNEEDIT Pain Relieving Knee Band allows for normal circulation and blood flow.
