

The Secrets of Great Business in Bad Times

Martin Edelston's I-POWER

...at your bookstore now

I-POWER is by the editor-in-chief of **BOTTOM LINE/PERSONAL** and **BOARDROOM**.

He is also the creator of *The Book of Inside Information*/more than 2 million copies sold and *The Book of Secrets*/more than 500,000 copies sold. His other best-selling titles include *The Book of Money Secrets* and *The Book of Tax Knowledge*—each of which has sold more than 250,000 copies.

"I-POWER is the best business book I've ever read...and I've read them all."

Robert Half, Robert Half International

There has never been a book offered to American business people so chock full of vital material designed to improve their businesses—large, medium and small businesses.

A business miracle...just when we all need a business miracle

One company cut its staff in half, tripled sales, and pushed profits through the roof.

See for yourself how powerful and simple **I-Power** is.

In time, you will want to buy copies in quantity—but, for now, get a copy for yourself. Let **I-Power** improve your business—and your personal life, too!

A LITTLE BOOK has started a quiet revolution in plants and offices all across the United States of America.

The principles of scientific management, unquestioned for decades, are being challenged—and banished to the dustbin of history.

A new breed of managers is returning to the commonsense practice of the great days when we were out-producing and out-selling the rest of the world...the days before management by objectives...before short-term thinking, short-term incentives, short-term goals...

This book has become the bible of that business revolution. It will show you a whole other way to run a company...a department...a business career.

I-Power is for people on top...and the bottom...and the many, many places in between.

Insiders call this system *Continuous Improvement*...**I-POWER** for short.

"Throw away all your fancy books on management theory and read I-POWER."

Dr. Leonard Sayles, Center for Creative Leadership

Pick up a copy today—before the competition does—and catch up on what your business school never taught you:

- How American **I-Power** fueled the "Japanese miracle" (we taught them much, *much* more than Quality Circles)...and why the whole secret is as American as apple pie
- The great American corporations that pio-

neered **I-Power**...Eastman Kodak in the 1890s...General Electric, Westinghouse, Met Life and Parke-Davis in the early 1900s...Bell Laboratories in the 1920s...

- The forgotten role of **I-Power** in building the US war machine in the 1940s

- Why such a simple, powerful American idea got lost in America. How its advocates were overwhelmed when postwar American business switched its emphasis from product excellence to marketing

- The rediscovery of **I-Power** today. An inside look at how it works in businesses from Kodak to Anheuser-Busch...and more

- **I-Power** and *your* company. Small companies who want to be big, see page 85. Big companies who want to stay big, see page 187

In a time when nothing works, here's one thing that really does.

I-Power will change the way you think about every element of business...cost control, quality control, productivity, staff meetings, delegation, hiring, firing, labor relations, executive compensation, incentive programs, profit-sharing...and that's just the beginning.

It slaughters all the sacred cows of the business schools. They can't keep teaching scientific management with a straight face after this.
